7. Roles & access control
8. Numbering & key concepts
9. How to use this in a client demo

1. What is Guru Traders Export ERP?

Guru Traders Export ERP is a web-based business system built for an **export trading house**. It connects the full chain of work in one place:

- Master data (buyers, products, suppliers, pricing rules)
- Sales (buyer inquiry ? quotation ? order confirmation)
- Procurement (purchase orders ? goods inward + QC)
- Export documentation (packing, invoices, VGM, bank/buyer docs, uploads)
- Finance trackers (bills, payments, receipts, commission)
- Reports (outstanding payables / receivables)
- Administration (users, roles, company letterhead)

The goal is simple: **one job moves through the company with the same numbers, same items, and the same documents** — without retyping buyer/product data on every desk.

Company letterhead on PDFs (GSTIN, IEC, bank, logo, signatory) comes from **Administration ? Company Profile**.

2. Who uses it?

+	Š
Merchandising	Masters, Inquiries, Order Confirmations, raise POs

Procurement / Store	Purchase Orders, Goods Inward
Quality	QC on Goods Inward (approve / reject quantities)
Packing	Cartons on shipment, packing lists
Export documentation	Export Documents, generate PDFs, upload CHA/LEO/BL/Swift/eBRC
Accounts	Finance trackers, Outstanding, Buyer Receipts
Admin	Users, Roles, Company Profile

You can also create an **Order Confirmation as a Direct Buyer Contract** (skip full inquiry) when the buyer has already confirmed commercially.

4. Modules explained

4.1 Dashboard

At-a-glance view of inquiries and order confirmations, with simple trends and status distribution.

4.2 Masters — the foundation

Nothing downstream (inquiry, OC, PO, export) works correctly until masters are set up.

Categories

Top-level product groups. Each category can offer the **Order Formats** that apply to it. Codes like **CAT001** are auto-generated.

Order Formats

Defines how the item table looks on Inquiry / OC / PO (columns, units, multi-colour, default delivery & packing text). This is why different product lines can have different grids without changing the software.

Products

Sellable / exportable items under a category. Includes commercial name, **name on export document**, units (PO vs export), HSN, GST %, price band, fabric measures where needed, barcode, etc.

Buyers

Overseas (or domestic) customers. Stores company details, invoice name, ports, agent & commission, payment terms, incoterm, currency, bank/SWIFT, and **carton marking lines** used on packing documents.

Suppliers

Vendors from whom goods are purchased. Linked to categories, discount (used in markup costing), agent, bank and contact details.

Jobbers

Same style of master as suppliers, kept as a separate desk for job-work parties.

Agents

Commission intermediaries on Buyer / Supplier / Jobber side. Stores commission % and who pays (we / supplier / buyer).

FOB Values

Simple named FOB value master used as a lookup in commercial work.

Markup

Buyer–supplier margin rules for costing. Conceptually: client price from cost + markup %; our cost after supplier discount; profit is the difference.

4.3 Sales

Inquiries

Buyer ask and internal price working against an Order Format. Status moves through Draft ? Price Working ? Quote Sent ? Confirmed ? Converted to OC (or Lost).

- **Quotation** is not a separate menu — download PDF / Excel from the Inquiry.
- Confirmed lines can be **Converted to Order Confirmation**.

Order Confirmations (OC)

Formal buyer agreement. After confirmation you can:

- **Raise PO for Selected** items (procurement)
- **Raise Export Document for Selected** items (shipment paperwork)

Statuses: Draft ? OC Sent ? Confirmed.

4.4 Procurement

Purchase Orders

One supplier's slice of confirmed OC lines. Tracks Draft ? Raised ? Partial ? Fully Received (Fully Received is driven by goods inward).

Goods Inward

Receive against a PO and record QC on the same screen (ordered / received / passed / rejected). There is **no separate Quality menu** — QC approve lives here. Statuses: Pending Inspection ? Approved (QC Passed) | Rejected.

4.5 Export

Packing

Carton desk for shipments. Carton numbers, net/gross weights, dimensions and lines are maintained on the Export Document; packing list PDFs are generated from there.

Export Documents

One outward consignment to one buyer. Holds logistics (ports, vessel/flight, forwarder, marks, cartons, freight/insurance) and a **full documentation checklist** from packing lists through eBRC.

Statuses: Draft ? In Progress ? **Closed** (when eBRC is uploaded).

Document OCR

Optional AI assist: upload a scan/PDF (CHA checklist, LEO, BL final, Swift, eBRC, etc.) and extract fields into the related checklist row (requires AI key configuration).

4.6 Finance

Finance screens are **operational trackers** tied to live PO / export data — useful for accounts visibility during operations. They are not a full accounting ledger (no complete voucher book yet).

	o š
Purchase Bills	Links to generated / uploaded purchase-bill style docs for the shipment
Debit Notes	PO-linked adjustment visibility
Supplier Payments	Payables planning view by PO status
Buyer Receipts	Receivables view vs Payment Proof / eBRC status on export docs
Agent Commission	Commission preview from PO × agent rates

4.7 Reports

- **Outstanding** — Supplier outstanding (from POs) and Buyer outstanding (from Export Documents)
- **Reports hub** — counts of POs, export documents, open/closed shipments

4.8 Administration

- **Company Profile** — exporter identity printed on documents
- **User Management** — create users, activate/deactivate, assign roles
- **Roles** — named roles with permission matrix
- **Permissions** — registry sync for admins

5. Documents & PDFs the system generates

5.1 From Sales (Inquiry)

- Quotation PDF
- Quotation Excel

5.2 From Export Document (system-generated)

Packing List	For Our Record (with Supplier); Without Supplier (for Carton); For Export Documentation
Item Summary	Raw Data (All Details); Split by Description & Price Band; Supplier-wise Split
Export Invoice	For Customs; For Buyer; For Bank; For E-way Bill
Purchase Bills (E-Sanchit related)	By Carton No. & Export Invoice / Balance Shipment; By Carton No., Item Description & Supplier
Delivery Challan	Single PDF
VGM (Verified Gross Mass)	LCL Shipment; FCL Shipment
Bill of Lading (Draft)	Single PDF
E-Invoice	Content for portal (IRN/QR captured later on checklist)
Docs to Bank	GR Waiver; Bill of Exchange
Buyer Docs	GR Release Email; Bill of Exchange Intimation

In the application: open **Export ? Export Documents** ? open the document ? use **Generate Documents** ? **View** each PDF.

6. Export checklist (packing ? eBRC)

Beside generated PDFs, each Export Document tracks uploaded / manual steps that happen with CHA, customs, shipping line and bank.

Checklist (from CHA)	Uploaded	

E-Sanchit Documents	Uploaded	
Examination	Manual	
Assessed Copy	Uploaded	
LEO Copy	Uploaded	
Container & Seal Numbers	Manual	
Measurement Copy	Uploaded	
CLP	Uploaded	
Bill of Lading (Final)	Uploaded	
Insurance Certificate	Uploaded	
Goods Received by Client	Manual	
Payment Received (Swift Copy)	Uploaded	
Payment Proof to Bank (EEFC)	Uploaded	
FIRC	Uploaded	Optional
Bank Certificate	Uploaded	
eBRC	Uploaded	Closes the Export Document / shipment

7. Roles & access control

Access is permission-based. Sidebar sections only appear if the logged-in user has at least one related permission.

+	+	
Super Admin		Everything
Admin		Full operations + users/roles/company (not permission sync)
Merchandising & Manufacturing		Masters + Inquiry/OC/PO focus
Accounts		Finance + reports visibility
Export Documentation & Foreign Payment		Packing, Export Documents, buyer receipts
Packing		Packing desk + related views

Quality Checker	Goods Inward QC approve
Jobworker	Limited PO / inward visibility

8. Numbering & key concepts

	o š
Financial year	India style April–March (example: 2026-27)
Auto series	Examples: CAT001, BUY01, INQ/{FY}/nnn, GT/{Buyer}/{seq}/{FY} (OC), GT/PO/..., GT/INW/..., GT/EXP/...
Order Format	Shapes the item grid and print layout for that product line
Colour × size	Supported when the chosen format allows multiple colours
Markup	Structured margin between supplier cost and buyer price
QC on inward	Passed vs rejected qty recorded at receipt
Cartons	Entered on Export Document; drive packing lists / weights
eBRC	Final bank realisation proof — closes the file

9. How to use this in a client demo

1. Show **Masters** briefly (Category ? Format ? Product ? Buyer/Supplier).
2. Open an **Inquiry**, show quotation PDF/Excel.
3. Open **Order Confirmation** ? Raise PO + Raise Export Document.
4. Show **Goods Inward** with QC approve.
5. Open **Export Document** ? cartons ? Generate Documents ? View PDFs.
6. Walk the checklist (what is system-generated vs uploaded).
7. Open **Finance** and **Outstanding** for accounts visibility.
8. Mention **roles**: different desks see only their work.

Sample system-generated PDFs for demo shipments can be shared from the **Guru-Traders-Demo-PDFs** folder (EXP-001 and EXP-002), or viewed live inside Export Documents.

This guide describes the product as delivered for client demonstration. Finance screens are trackers linked to operational data; full ledger accounting can be extended as a later phase if required.
